

## THIRD PARTY DATA EXTRACTS

Take full advantage of third party vendor functionality with automated data extracts.

### Data Movement made easy

ID' Custom Data Extract Technology is used to develop solutions that quickly move data and format information to meet third party data requirements. Our highly efficient data pump infrastructure design allows consistent automated data transference using an automatic scheduler.

Any data source that can be accessed via native SQLServer and ODBC can be accessed to prepare data extracts for third party vendors.

ID currently has extracts available for:

- BSA/AML Regulatory Compliance
- Mortgage Processors
- Portfolio Reviews
- Home Banking and Bill Pay Vendors
- Collection Systems
- MCIF and Marketing Systems

To learn more about Custom Third Party Data Extracts contact us today!

### Features and Benefits

- Full automation of the data extraction process
- Highly efficient data pump technology moves data quickly from your source databases
- Data extracts are performed using an automated scheduler
- Custom extracts can be built for third party vendors based the data that is available in your core systems
